

Standard automatic open/close built-in shutter covers entire coupling hole

\*Additional colors available on both adapters

## All in One LC Adapter Series

*Dust Protection | Rattle Free Latch | Active Port Visibility*

Sanwa's All in One LC Adapters meet the needs of applications where the adapter must install tightly and be resistant to vibration. Designed with metal plates on all sides of the adapter that expand to tightly fit into the panel, these adapters provide a secure, vibration-resistant fit.

The All in One LC Adapters come with dust protection shutters, which are designed to cover the entire coupling hole. These built-in shutters are automatically opened as the LC connector is inserted, and closed as it is extracted, providing a barrier against dust and protecting workers' eyes from laser exposure.

### FEATURES

- Insertion loss (typical); 0.2dB or less
- IP 5x
- No Dust Cap required on front side
- Laser protection, white translucent shutter available
- UL94V-0 flammability grade
- RoHS and REACH compliant
- IEC61754-20, TIA/EIA 604-10A, GR-326-CORE compliant
